GULF AND HORMUZ CHOKEPOINT WATCH

The Strait of Hormuz and wider Gulf featured in this reporting period's fuel-route reporting. Coverage centred on Hormuz closure and shipping disruption, forcing dependent crude and product flows onto longer, costlier routes and lifting the war-risk premium.

The chokepoint remains a live, standing watch given the fragility of the route.

- Assessed: plan against overall severity High.
- Reported: verify supplier, route and stock exposure against the 32 qualifying incidents.

WATCH NEXT

- Potential: Subsidy or levy decisions - a single gazette notice can reset pump price and contract economics overnight.
- Potential: Rationing or forecourt disruption - queue formation, allocation cuts or station closures are the fastest operational tells.
- Potential: Refinery outages or force-majeure declarations - these feed into crack spreads and downstream pricing within days.
- Potential: Tanker and route disruption - fresh Gulf, Hormuz or Red Sea advisories, naval movement or vessel reroutes shift war-risk premium and transit time.
- Potential: Generator fuel availability - diesel and LPG stock cover at high-fuel-use sites is the continuity tell when forecourts tighten.
