

CARGO WATCH

POLESTAR INSIGHTS

REPORTING PERIOD: 13 JUNE 2026 - 12 JULY 2026

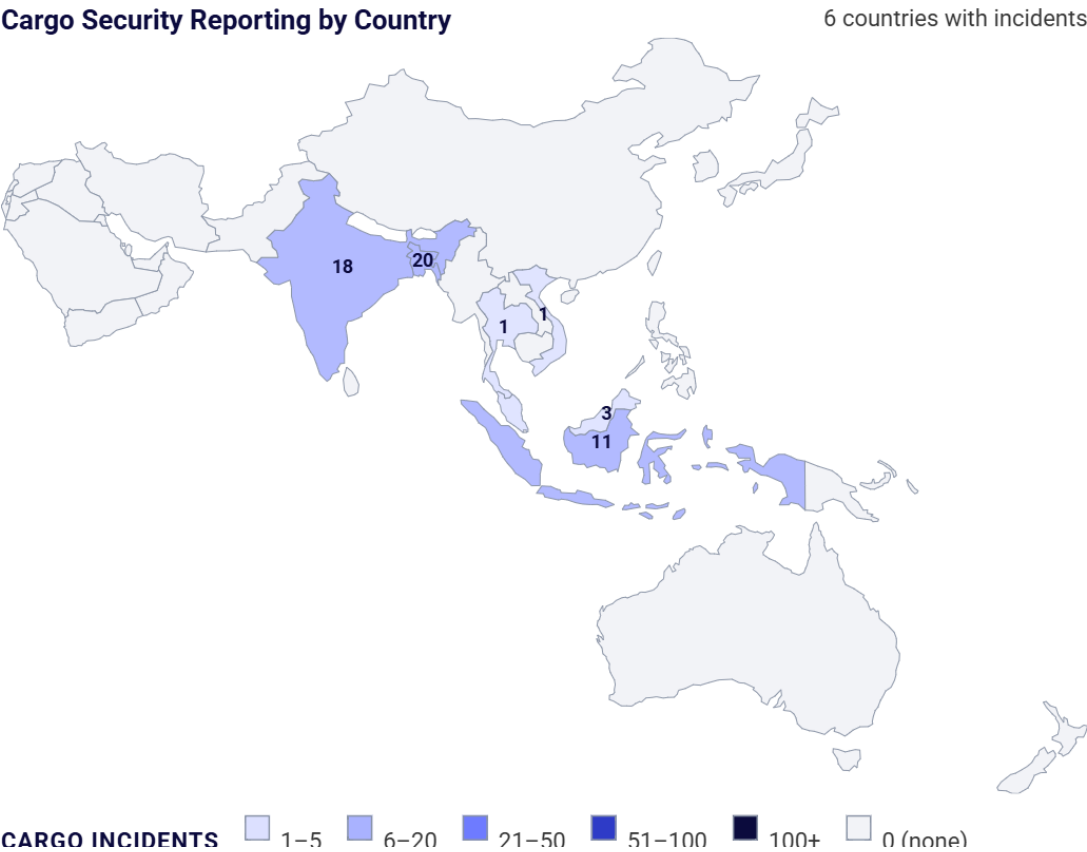

EXECUTIVE SUMMARY

Cargo-security reporting this period centred on inland transport activity, with cargo theft in transit and warehouse theft the clearest drivers of exposure. Reporting was most concentrated in Bangladesh. Overall severity was predominantly moderate, with a minority of events reaching high severity. This keeps route security and driver integrity the main operational priority, with route planning and driver vetting the controls most in need of reinforcement across the region.

FAST FACTS

REPORTING PERIOD 13 Jun - 12 Jul 2026	TOTAL RECORDS 54 Cargo Watch this period	HIGHEST SEVERITY High Highest rating this period
TOP ISSUE TYPE Cargo theft in transit 33 records	MOST AFFECTED COUNTRY Bangladesh 20 records	LATEST INCIDENT 11 Jul 2026

CARGO SECURITY REPORTING BY COUNTRY

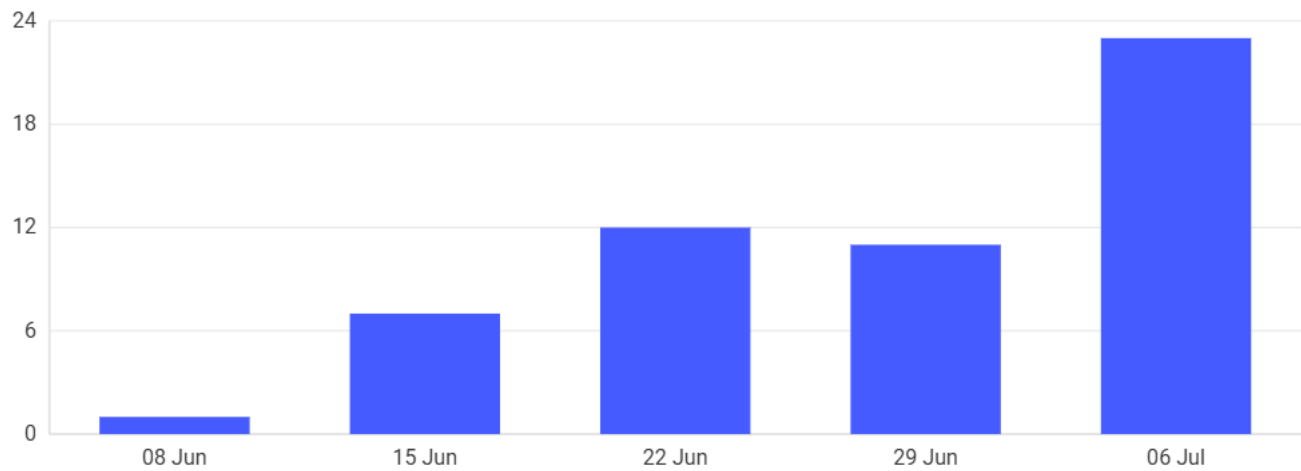

Reporting was concentrated in Bangladesh (37% of located incidents).

WEEKLY TREND AND ACTIVITY

Weekly Cargo Theft Trend

54 records across 5 weeks

In-scope cargo incidents per week 08 Jun to 06 Jul
Activity increased during the final reporting week driven mainly by inland transport incidents.

Weekly Activity by Pattern

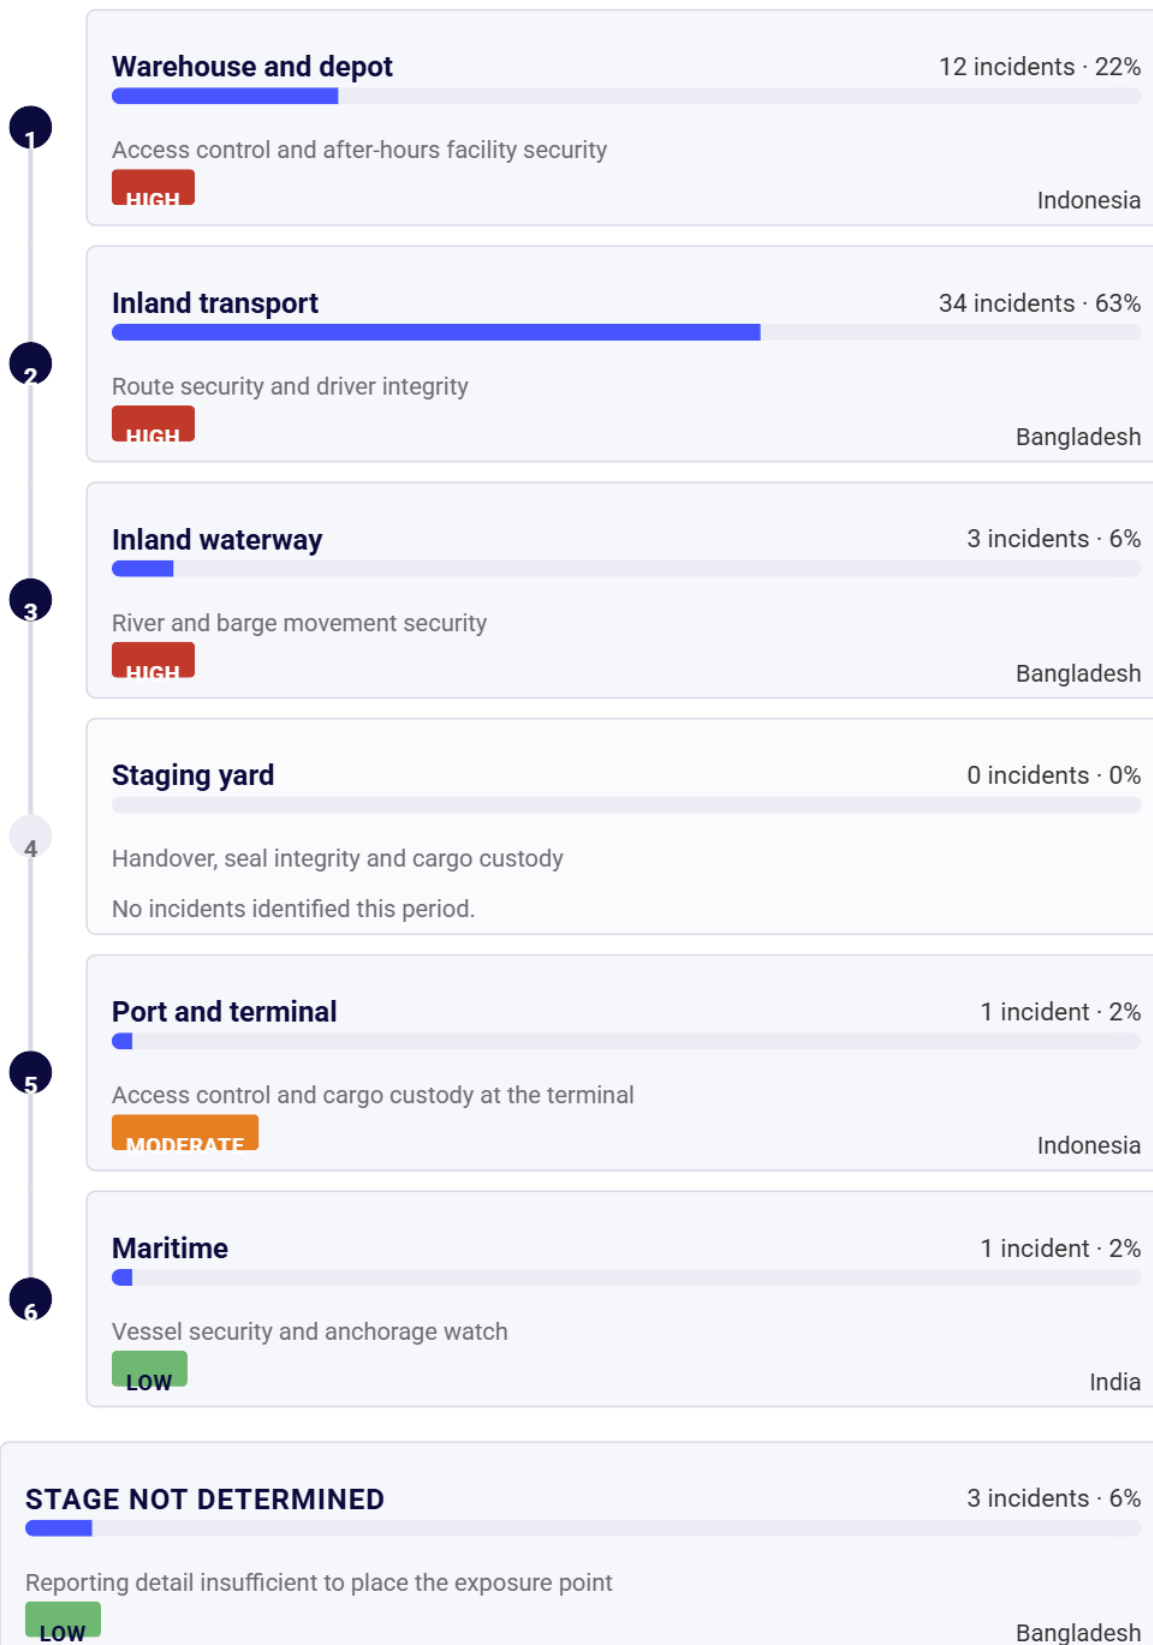

Pattern	08 Jun	15 Jun	22 Jun	29 Jun	06 Jul	Total
Warehouse and depot	0	2	3	1	6	12
Inland transport	1	4	7	9	13	34
Inland waterway	0	1	0	0	2	3
Staging yard	0	0	0	0	0	0
Port and terminal	0	0	0	1	0	1
Maritime	0	0	1	0	0	1
Other or unattributed	0	0	1	0	2	3
Weekly total	1	7	12	11	23	54

Reported activity clustered in the final two reporting weeks, led by inland transport.

Cell shading reflects reporting frequency, not severity – a stronger blue means more incidents were reported in that pattern and week.

Supply-Chain Exposure

Where this period's cargo incidents fall across the movement chain.

Share is each stage's percentage of the period's unique incidents.

Operational Patterns

Leading incident types within the broader supply chain exposure.

Cargo theft in transit

HIGH

33 incidents · 61% · Bangladesh

Concern: Route security and driver integrity

Route planning

Driver vetting

In-transit tracking

Escort protocols

Watch: Repeat hits on the same corridor, operator or load type. Focus: Bangladesh.

Warehouse theft

HIGH

12 incidents · 22% · Indonesia

Concern: Access control and after-hours facility security

Perimeter security

CCTV and alarms

Guarding

Access control

Watch: Repeat intrusion at the same facility, operator or after-hours window. Focus: Indonesia.

Other cargo security incident

LOW

3 incidents · 6% · Bangladesh

Concern: Reporting detail insufficient to place the exposure point

Reporting quality

Source corroboration

Watch: Whether fuller reporting clarifies where in the chain the exposure sits. Focus: Bangladesh.

Container theft (inland)

MODERATE

2 incidents · 4% · Indonesia

Concern: Route security and driver integrity

Route planning

Driver vetting

In-transit tracking

Escort protocols

Watch: Repeat hits on the same corridor, operator or load type. Focus: Indonesia.

Share is each pattern's percentage of the period's unique incidents.

ENFORCEMENT ACTIVITY

13 enforcement outcomes reported this period (arrests, seizures or recoveries), shown separately and excluded from the incident totals above.

SITUATION

Cargo exposure this period was led by inland transport activity and concentrated in Bangladesh, with cargo theft in transit and warehouse theft the clearest patterns.

WHAT MATTERS

- Cargo theft in transit centred on Bangladesh: this matters because it directly stresses route security and driver integrity, raising exposure for cargo owners.

IMPLICATIONS

- The reported warehouse theft in Indonesia confirms warehouse and depot as a live exposure point for affected consignments.

WATCH NEXT

- Repeat hits on the same corridor, operator or load type.

KEY INCIDENTS

Incidents that best illustrate the main operational patterns identified during the reporting period.

06 Jul 2026

Indonesia · Warehouse theft

Indomaret retail distributor warehouse in Batu City robbed; goods losses reach tens of millions

Operational relevance: Highlights static-site exposure at storage and distribution facilities, where access control and after-hours security carry the load.

POLESTAR VIEW

Cargo-security exposure this period is inland transport-led and concentrated around Bangladesh, and most consistent with opportunistic, financially motivated theft, not a coordinated or politically driven campaign. The data supports a picture of cargo theft in transit and warehouse theft affecting inland transport exposure, with moderate severity most common and losses on cargo owners and logistics providers. It does not support claims of an organised cross-border network, a confirmed insider or seal-compromise dimension, or a statistically meaningful surge, none of which the records establish. Reporting is drawn from open sources with only partial enrichment: loss values, cargo types and movement stage are frequently unstated, so totals and shares are indicative, not exhaustive. In the near term, further inland transport incidents of a similar character are likely in and around Bangladesh, absent a change in local enforcement or operators' own measures. Overall analytical confidence is moderate to high, reflecting corroborating volume against open-source and enrichment limitations.
