

CARGO WATCH

POLESTAR INSIGHTS

REPORTING PERIOD: 8 MAY 2026 - 6 JUNE 2026

[POLESTAR-ADVISORY.COM](https://www.polestar-advisory.com)

EXECUTIVE SUMMARY

Cargo loss this month was shaped by theft and loss, warehouse theft and truck hijack. Indonesia saw the most consistent reporting, alongside Papua New Guinea and Saudi Arabia. The most serious reached moderate.

EST. CARGO LOSS (USD) Not disclosed No source-stated USD figures	MOST STOLEN COMMODITY General Cargo 11 records	

CARGO THEFT TREND

Weekly Cargo Theft Trend

13 records across 5 weeks

In-scope cargo incidents per week, 04 May to 01 Jun.

CARGO SECURITY READ

Route-side and convoy cargo risk showed up this month, covering truck hijackings, container theft, in-transit loss and similar crime. The most recent example is "STFC Asserted That the Soekarno-Hatta Cargo Theft Occurred Before Handover", reported 25 May 2026. The countries named most often among these route-side records are Indonesia, Papua New Guinea and Saudi Arabia.

Watch for clustering on specific corridors, repeat operator names in the same week and any escalation from pilferage to coordinated hijack. Insurance loss bulletins and transport-association advisories are the earliest signs that risk on the road is building.

LOGISTICS HUB READ

Logistics-hub risk across warehouses, depots, distribution centres, terminals and bonded storage showed up this month. The most recent example is "Police Visit Scene at PT Nexa Prima, Sabangau Police Follow Up Alleged Warehouse Theft", reported 05 Jun 2026. The countries named most often among these hub-side records are Indonesia.

Watch for repeat incidents at the same facility or operator, escalation from pilferage to organised raids, and any insurance-premium movement on affected corridors. Hub-side losses typically precede a hardening of underwriting terms by one to two weeks.

COUNTRY RISK BREAKDOWN

REGION / COUNTRY	CURRENT PATTERN	SEVERITY	OPERATIONAL READ
Indonesia 11 records	Warehouse theft	MODERATE	Road-movement losses dominate; harden corridor selection and driver vetting on contracted hauliers before the next high-value move. Repeat reporting points to a corridor under sustained pressure.
Papua New Guinea 1 record	Truck hijacking, route-side exposure	MODERATE	Truck and convoy hijacking is the recurring method; corridor selection, escort cover on high-value loads and driver vetting are the first controls.
Saudi Arabia 1 record	Truck hijacking	LOW	Truck and convoy hijacking is the recurring method; corridor selection, escort cover on high-value loads and driver vetting are the first controls.

REGIONAL READ

Indonesia is the main pressure point this month, with road-movement incidents clustering on the route side. For clients the focus is route security across Indonesia, Papua New Guinea and Saudi Arabia — corridor selection, escorts on high-value loads and driver vetting.

SITUATION

Warehouse, depot and road corridors hold the live exposure, currently visible in theft and loss, warehouse theft and truck hijack. Indonesia sits at the centre of the recurring geography.

WHAT HAPPENED

The dominant patterns were theft and loss, warehouse theft and truck hijack. Loss reporting concentrated on Indonesia, Papua New Guinea and Saudi Arabia. The most serious reached moderate.

WHAT MATTERS

Loss in this category lands directly on supply chain continuity, insurance exposure and the cost of moving goods through repeat corridors. Repeat geography in Indonesia, Papua New Guinea and Saudi Arabia points to known modus operandi rather than isolated events.

IMPLICATIONS FOR BUSINESS

- Review routing, escort use on high-value moves, depot access controls, seal and lock checks at handover, and insurance cover for repeat corridors. Cross-check supplier vetting on yard staff and contracted drivers.

WATCH NEXT

- Look for copycat losses on the same corridor inside two weeks of a reported event, fresh arrests or recoveries, and route shifts that quietly push volume through weaker depots.

POLESTAR VIEW

Insider knowledge and route familiarity continue to drive the larger losses. Indonesia, Papua New Guinea and Saudi Arabia hold the recurring geography; Indonesia is the lead pressure point.
