

CONFLICT WATCH

POLESTAR INSIGHTS

REPORTING PERIOD: 7 SEPTEMBER 2026 - 13 SEPTEMBER 2026

FAST FACTS

REPORTING PERIOD 7 Sep - 13 Sep 2026	DISTINCT INCIDENTS 47 Conflict incidents this period	HIGHEST SEVERITY Extreme Highest rating this period
TOP EVENT TYPE Armed Clashes 20 records	MOST AFFECTED COUNTRY Myanmar 14 records	LATEST INCIDENT 13 Sep 2026

BLUF

The most serious activity this period is in Myanmar, around Rakhine State and Sagaing Region. The most serious case involved a bombing or airstrike near Sagaing Region with casualties reported on 9 Sep. Pakistan and India also saw serious activity this period, with deadly attacks. Malaysia is on watch after high-impact attacks just before this reporting period.

TOP ACTIVITY AREAS

MYANMAR

Myanmar's sharpest activity this period centres on Rakhine State and Sagaing Region, where bombings, airstrikes and insurgent attacks are threatening roads, checkpoints, convoy movement and nearby worksites. The rest of Myanmar has stayed largely clear. Recent cases involved a bombing or airstrike near Sagaing Region with casualties reported on 9 Sep and a bombing or airstrike in Myanmar with casualties reported on 13 Sep. Several of these attacks killed people.

PAKISTAN

Pakistan saw heavier activity around Balochistan, where insurgent attacks and armed clashes can reach government and security sites and nearby worksites. These included an insurgency attack near Balochistan with casualties reported on 9 Sep and an insurgency attack in Pakistan with casualties reported on 8 Sep. Some proved lethal.

INDIA

India also registered activity around Manipur and the Maoist (Naxal) belt, where armed clashes and insurgent attacks have struck government and security sites and nearby worksites. Notable cases involved an insurgency attack in India with casualties reported on 9 Sep and an armed clash near Manipur with casualties reported on 13 Sep. There were fatalities.

OTHER WATCHED THEATRES

Lower-level activity also showed in Indonesia, Philippines, Sri Lanka and West Papua. The most notable case involved an armed clash in Indonesia with casualties reported on 11 Sep in Indonesia. It was quieter there this period, but any of these could worsen quickly on a single clash or attack, so they stay on watch.

WHAT MATTERS FOR BUSINESS

The priority is people. Anyone travelling through or working near the hardest-hit parts of Myanmar risks being caught in an attack, a security sweep, a checkpoint or a sudden road closure.

For business, that means tighter precautions where the violence is concentrated, rather than a blanket change across the rest of Myanmar. Plan journeys and routes with care, confirm site access before staff set out, and give every depot, worksite and route a clear way to pause, reroute or pull people out at short notice. Set your evacuation triggers now, while there is still room to decide calmly.

WATCH NEXT

- Expect further bombings, airstrikes and insurgent attacks around Rakhine State. The signal to watch is repetition - the same districts or routes being hit more than once.
- The clearest sign of escalation is spread: violence reaching neighbouring areas, or fresh checkpoints, road closures and curfews. That would mean the fighting is widening rather than easing.
- Above all, watch for any attack close to a depot, worksite, convoy route or key infrastructure. That is the point where this stops being background reading and becomes a live duty-of-care concern.

POLESTAR VIEW

The most serious activity this period is in Myanmar, concentrated around Rakhine State. Pakistan and India saw further serious activity, with deadly attacks. Malaysia also warrants watching after high-impact attacks just before this period. The response is straightforward: keep people clear of the affected areas, tighten journey and route planning, protect the sites that matter most, and agree evacuation triggers well in advance.
