

PAPUA

POLESTAR INSIGHTS

REPORTING PERIOD: 24 JUNE 2026 - 30 JUNE 2026

BOTTOM LINE UP FRONT

The operating picture for West Papua this period looks to be deteriorating: the bulk of reporting concerns violent crime concentrated around Papua Tengah and Papua Barat Daya. For business users, the principal business risk is direct exposure to violence and disruption at affected sites.

TOP 3 DEVELOPMENTS

TPNPB Claims To Have Killed One TNI Soldier In Intan Jaya, Seven Other Wounded

HIGH

Homicide / violent crime · Papua Tengah · Reported 29 Jun 2026 · Google News - West Papua (Insurgency & Violence)

Heightened personal-security risk locally; review after-hours exposure and movement protocols.

TPNPB claims responsibility for TNI soldier's death in Intan Jaya

HIGH

Other security · Papua Tengah · Reported 29 Jun 2026 · Jubi.id (West Papua)

Security-relevant development; monitor for operational follow-on in the affected area.

LOW

Fire · Reported 26 Jun 2026 · Media Pro Rakyat

Property damage and possible business interruption from fire; verify site safety and continuity arrangements.

INCIDENT DETAILS

CRIME, THEFT & ROBBERY

Crime, theft and violent incidents were reported, including homicide and violent crime, theft and break-in and terrorism and militancy. It concentrated in Papua Tengah and Papua Barat. High-severity reporting featured. Incidents of this kind threaten staff, premises and the movement of cash and assets.

GOVERNANCE & REGULATORY

Policing, regulatory and political-stability activity was reported, including government stability. It concentrated in Papua and Papua Tengah. Regulatory, policing and political-stability friction can affect compliance, permits and freedom of movement.

FIRE & EXPLOSION

Fire and explosion incidents were reported in Papua Barat Daya and Papua Barat. Where source reporting identified deliberate fire or arson, it has been treated as security relevant. Other fire reports are treated as local disruption or business continuity issues unless a cause is confirmed. For business users, the operational concern is local disruption: road closures, evacuation, utility interruption, access restrictions and possible impact on nearby offices, warehouses, hotels, client sites or transport routes.

OTHER OPERATIONAL DISRUPTION

Operational disruption to transport, utilities or connectivity was reported, including other security. It concentrated in Papua Tengah. Disruption of this kind can interrupt operations, logistics and connectivity.

CURRENT SITUATION

The security picture in West Papua this period was dominated by violent crime, fires and other security-relevant incidents. Reporting clustered around Papua Tengah, Papua Barat Daya and Papua Barat. The most serious entry reached High severity.

The picture is operational rather than a single dramatic event: the priority for business users is movement security, premises protection and continuity at exposed sites while this picture holds.

OPERATIONAL IMPACT

- Protest & civil unrest - Gatherings and crowd-control responses can close roads and disrupt access at short notice; build in transit buffers and keep routes flexible.
- Crime, theft & robbery - Direct threat to staff, premises and the movement of cash or assets; harden security, vary routines and brief travellers.
- Natural hazards - Weather and geological hazards can interrupt transport, utilities and site access; check conditions before movement and confirm site readiness.
- Governance & regulatory - Regulatory, policing and political-stability friction can affect compliance, permits and freedom of movement; monitor official guidance.
- Fire & explosion - Fires and explosions cause localised damage and forced evacuation around affected sites; confirm site status before approach.

RECOMMENDED ACTIONS

MOVEMENT SECURITY

- Vary routes and timings, avoid predictable patterns, and confirm route status before travel.
- Route around gatherings, rallies and choke points, and build in extra transit time.
- Treat areas with confirmed violence as no-go for non-essential travel; use secure transport for any

essential movement.

SITE SECURITY

- Maintain premises protection: access control, guarding and after-hours security at exposed sites.
- Treat fires reported as deliberate or attack-related as a security matter: review site protection and access control around affected premises.
- Confirm site fire status, fire-safety provision and evacuation readiness before approach.

STAFF AWARENESS

- Brief staff and travellers on current risks, local reporting lines and areas to avoid.
- Remind staff to keep a low profile with cash, devices and valuables in public.

JOURNEY PLANNING

- Confirm road, air and port status before travel and hold viable alternates.
- Check weather and hazard conditions before movement and allow for delays.

ESCALATION TRIGGERS

- Activate contingency and movement-restriction plans if higher-severity or casualty-bearing incidents reach or near operating sites.

LOCAL MONITORING

- Track local reporting and official advisories for the locations on the watchlist, and reassess as fresh reporting comes through.

OUTLOOK: NEXT SEVEN DAYS

The coming week most likely follows the current pattern, led by violent crime, with fires also likely to recur. Key locations to watch: Papua Tengah and Papua Barat Daya.

Escalation triggers: a spread of high-severity or casualty-bearing incidents beyond the locations above, and flashpoints around security-force operations, separatist anniversaries, student mobilisation and flashpoints around resource projects.

Concern would ease with a sustained quiet stretch across Papua Tengah and Papua Barat Daya, no further high-severity or casualty-bearing incidents, and no spread to new districts. Were the picture to deteriorate, expect direct disruption to movement and site access at the affected locations, with knock-on delays to staff travel and logistics.

ESCALATION INDICATORS

- Larger or coordinated protest mobilisation, or labour action spreading to key sites and corridors
- Further casualty-bearing or higher-severity violence at or near operating sites
- Spread of incidents beyond Central Highlands (Highland & Central Papua) and Bird's Head (West &

Southwest Papua) into new districts

POLESTAR VIEW

Polestar assesses that operating risk in West Papua is deteriorating, driven by crime and violent incidents, fire and explosion incidents and transport and utility disruption. The main business exposure is staff safety, secure movement of cash and assets and business continuity. The most exposed areas are Central Highlands (Highland & Central Papua) and Bird's Head (West & Southwest Papua). The most likely disruption over the next seven days is continued exposure to violent and opportunistic crime. The assessment would worsen if larger-scale incidents, casualty-bearing violence or sustained disruption emerge around security-force operations, separatist anniversaries, student mobilisation and flashpoints around resource projects. For now, operators should tighten movement planning and site protection at the exposed locations and keep contingency arrangements under active review.
