

DB Ports Pilot - 9-22 September 2026

WORKING / UNVERIFIED SNAPSHOT

Edition period: 2026-09-09 to 2026-09-22

Generated: 2026-09-22 04:03:32 UTC

Edition revision: 1

Edition status: draft

EDITORIAL OVERVIEW

This first DB Ports pilot draft covers 9-22 September 2026 and is for internal review only. No priority development has yet passed analyst verification and selection. The absence of approved items is a research outcome, not an assessment that regional operations were unaffected.

Two primary-source leads are retained on hold. A Malaysian navigation notice concerns offshore drilling beginning on 22 September; a material connection to port operations or a confirmed client route has not been established. A Hong Kong notice describes a planned electronic port-formalities outage on the same day, but its publication date and any realised processing effects remain unverified. Neither lead is presented as an approved incident or assigned a severity rating.

The checked ReCAAP weekly report covers 8-14 September only; it cannot establish conditions for the remainder of this edition. Other targeted source searches produced no qualifying current item, and an inaccessible Indonesian weather-warning download remains a coverage gap. Source checks are recorded separately from analyst approval.

The next review should resolve publication dates, operating materiality and asset relevance before selecting any development. The provisional port roster is not a confirmed client asset list. No human research hours, independent review or permission to distribute this draft is implied.

PRIORITY DEVELOPMENTS

No developments selected. The edition has not been padded to meet a quota.

WATCH LIST

No watch items saved. The edition has not been padded to meet a quota.

PENDING VERIFICATION APPENDIX

Inbox and hold items only. These are leads, not established events, and are excluded from the reviewed findings.

Malaysia Marine Department warns mariners around PM3 CAA drilling activity

Geography / asset: Malaysia - Block PM3 CAA, South China Sea (06°58.638N, 104°10.825E); assets: HAKURYU-14 drilling rig and support vessels JM ABADI and PTSC TITAN

Event date: 2026-09-22

Severity: not assessed

Confidence: unverified

Review state: Unverified working item; analyst review not recorded

Source-reported statements awaiting analyst verification: Not recorded.

Unverified claims: Notice to Mariners 176(T)/2026 states that vessel movements and exploration-well drilling at Block PM3 CAA run from 22 September through 16 October 2026.

The notice identifies one drilling rig and two anchor-handling tug supply vessels and gives a WGS-84 work-area coordinate.

Operating implications: The notice advises vessels passing the specified drilling area to give a wide berth and navigate with caution. No port closure, terminal delay or effect on a confirmed client route has been established.

Outlook: Check whether operations commenced and whether a confirmed client route intersects the work area before considering this notice for selection.

Missing information: The notice does not quantify the berth distance, traffic delays, affected voyages or any port-call impact. No operator confirmation of actual activity commencement on 22 September was located.

Requires analyst verification, operating-materiality assessment and sign-off; research assistance is not approval.

Source title: Malaysia Marine Department warns mariners around PM3 CAA drilling activity

Supporting extract: Mariners are advised to give wide berth when passing and navigate with caution when in the vicinity.

Hong Kong Marine Department schedules six-hour outage of all electronic port-formality services

Geography / asset: Hong Kong - Hong Kong; assets: Marine Department Electronic Business System (eBS)

Event date: 2026-09-22

Severity: not assessed

Confidence: unverified

Review state: Unverified working item; analyst review not recorded

Source-reported statements awaiting analyst verification: Not recorded.

Unverified claims: The Marine Department eBS page states that all eBS services will be unavailable from 18:00 to 23:59 HKT on 22 September 2026.

The same primary page describes eBS as handling port formalities and shipping-related documents required by the Marine, Health and Immigration departments.

Operating implications: The notice identifies a planned interruption to the electronic port-formality channel. Actual processing delay, operational effects and fallback arrangements have not been verified.

Outlook: Establish the notice publication date, fallback submission arrangements and service-restoration status before considering selection.

Missing information: The page does not display a publication timestamp, so publication within the 9-22 September window cannot be proven.

No fallback submission method, affected transaction count or evidence of realized processing delay is stated.

Requires analyst verification, operating-materiality assessment and sign-off; research assistance is not approval.

Source: Hong Kong Marine Department - publication date: not recorded; source date: not recorded; not checked

URL: <https://ebs.mardep.gov.hk/>

Source title: Hong Kong Marine Department schedules six-hour outage of all electronic port-formality services

Supporting extract: eBS maintenance will be carried out on 22 September 2026 (Tuesday); all services are listed as temporarily unavailable from 18:00 to 23:59 HKT.

SOURCE CHECKS AND COVERAGE GAPS

Only checks saved in this snapshot are listed. An absent roster source is not assumed to have been covered.

my-marine

Status: checked

Checked at: 2026-09-22 03:57:44 UTC

Notes / gap: Research assist: directly checked NTM176(T)/2026, issued 14 September. Held offshore-drilling lead; actual port/client-route materiality unproven. Dynamic port-circular index returned no linked rows; that separate coverage gap remains.

hk-ebs

Status: checked

Checked at: 2026-09-22 03:57:44 UTC

Notes / gap: Research assist: directly checked the eBS page and its 22 September 18:00-23:59 HKT maintenance notice. Publication date not visible; actual delay and fallback arrangements unverified. Held, not approved.

bmkg

Status: unavailable

Checked at: 2026-09-22 03:57:44 UTC

Notes / gap: Research assist: eastern Central Java wave-warning download returned Invalid or expired token. Routine port forecasts did not demonstrate disruption. This is a coverage gap, not evidence of no hazard.

osaka-customs

Status: no material

Checked at: 2026-09-22 03:57:44 UTC

Notes / gap: Research assist: checked Osaka Customs index. Surfaced 11, 15, 16 and 18 September entries were administrative/procurement/statistical. Publication date and port-flow effects of an October building-power-outage notice were not established. Limited check, not complete Japan coverage.

auckland

Status: no material

Checked at: 2026-09-22 03:57:44 UTC

Notes / gap: Research assist: fetched <https://www.poal.co.nz/news-media/operations-update-44>; 19 August 2026, outside this window. Response truncated. No qualifying current item retained; not complete New Zealand coverage.

nsw-ports

Status: no material

Checked at: 2026-09-22 03:57:44 UTC

Notes / gap: Research assist: checked Sydney Harbour community notifications. Road-work entry starting 6 September lacked established publication date and material cargo-access effect. Not complete Australian port coverage.

fiji-customs

Status: no material

Checked at: 2026-09-22 03:57:44 UTC

Notes / gap: Research assist: checked <https://frcs.org.fj/news>. Visible in-window tax engagement/community entries were out of scope; response truncated. Not complete Fiji coverage.

recaap

Status: no material

Checked at: 2026-09-22 03:57:44 UTC

Notes / gap: Research assist: checked <https://www.recaap.org/> and its linked 8-14 September 2026 weekly report. No piracy/armed-robbery incidents were reported for that week only. This does NOT cover 15-22 September; report period is not proof of publication date. Standing vigilance advice not treated as a new event.

EFFORT AND METHODOLOGY

Counts reflect logged real minutes only. Zero means effort was not logged, not that no work occurred. Coverage is limited to saved checks and evidence and is not comprehensive.

Pilot effort

Logged minutes: 0

Corrections: 0

Missed signals: 0

DISCLAIMER

Internal, unpublished DB Ports pilot. Provisional coverage targets are not confirmed client assets. This edition is not a comprehensive regional service. Source-reported statements, confirmed facts and analytical judgments are distinguished; unverified leads must not be treated as established events. No client distribution is authorised.
