

# INDONESIA

POLESTAR INSIGHTS

REPORTING PERIOD: 24 JUNE 2026 - 30 JUNE 2026

## BOTTOM LINE UP FRONT

---

The Indonesia operating picture deteriorated this week, with higher-severity reporting across regulatory, corruption and governance issues, fire and explosion incidents and natural hazards. Greater Jakarta & West Java, Central & East Java and Sumatra remain the main exposure for staff movement and site continuity. Business users should tighten movement planning, monitor localised fire, utility and transport disruption and check site continuity and watch for regulatory or local-authority follow-on.

## TOP 3 DEVELOPMENTS

---

### 11 people dead in plane crash in France

LOW

Transport disruption · Reported 29 Jun 2026 · CNN Indonesia

Possible flight-schedule and airport-access disruption affecting travel and air freight.

### Photos of plane crashing vertically into densely populated area, fatalities reported

LOW

Transport disruption · Reported 28 Jun 2026 · CNBC Indonesia

Possible flight-schedule and airport-access disruption affecting travel and air freight.

### Shooting incident in Bolmut, police investigate death of Briptu Excel Mamuli

HIGH

Armed robbery / violent crime · Reported 29 Jun 2026 · Kompas.tv

Heightened personal-security risk locally; review after-hours exposure and movement protocols.

## INCIDENT DETAILS

---

### PROTEST & CIVIL UNREST

Protest activity and the crowd-control response to it were reported, including protest and civil unrest and labour action. It concentrated in East Java, North Sumatra and Lampung. High-severity reporting featured. Gatherings and the response to them can close roads and disrupt access at short notice.

### CRIME, THEFT & ROBBERY

Crime, theft and violent incidents were reported, including crime and theft and robbery, armed robbery and violent crime and terrorism and militancy. It concentrated in East Java, North Sumatra and West Java. High-severity reporting featured. Incidents of this kind threaten staff, premises and the movement of cash and assets.

### NATURAL HAZARDS

Natural-hazard and environmental disruption was reported, including natural hazard. It concentrated in Banten, Aceh and DKI Jakarta. High-severity reporting featured. Hazards of this kind can interrupt transport, utilities and site access.

#### GOVERNANCE & REGULATORY

Policing, regulatory and political-stability activity was reported, including regulatory and corruption and governance and security force activity. It concentrated in Banten, Yogyakarta and Central Java. High-severity reporting featured. Regulatory, policing and political-stability friction can affect compliance, permits and freedom of movement.

#### FIRE & EXPLOSION

Fire and explosion incidents were reported in Banten, West Java and Riau. Where source reporting identified deliberate fire or arson, it has been treated as security relevant. Other fire reports are treated as local disruption or business continuity issues unless a cause is confirmed. For business users, the operational concern is local disruption: road closures, evacuation, utility interruption, access restrictions and possible impact on nearby offices, warehouses, hotels, client sites or transport routes.

#### OTHER OPERATIONAL DISRUPTION

Operational disruption to transport, utilities or connectivity was reported, including other security and transport disruption. It concentrated in North Sumatra, DKI Jakarta and West Kalimantan. High-severity reporting featured. Disruption of this kind can interrupt operations, logistics and connectivity.

## CURRENT SITUATION

---

Activity this week concentrated on regulatory, corruption and governance issues, fire and explosion incidents and natural hazards, concentrated around Greater Jakarta & West Java, Central & East Java and Sumatra. The main business impact is direct exposure to violence and major disruption at affected sites. The reporting picture this week reads as broad and deteriorating.

## OPERATIONAL IMPACT

---

- Protest & civil unrest - Gatherings and crowd-control responses can close roads and disrupt access at short notice; build in transit buffers and keep routes flexible.
- Crime, theft & robbery - Direct threat to staff, premises and the movement of cash or assets; harden security, vary routines and brief travellers.
- Natural hazards - Weather and geological hazards can interrupt transport, utilities and site access; check conditions before movement and confirm site readiness.
- Governance & regulatory - Regulatory, policing and political-stability friction can affect compliance, permits and freedom of movement; monitor official guidance.

- Fire & explosion - Fires and explosions cause localised damage and forced evacuation around affected sites; confirm site status before approach.

## RECOMMENDED ACTIONS

---

- Nationally: Monitor for regulatory, procurement or local authority follow-on.
- Greater Jakarta & West Java: Monitor hazard and flood warnings; check site access, drainage and continuity arrangements.
- Central & East Java: Avoid protest locations, allow extra journey time and keep routes flexible.
- Sumatra: Monitor for regulatory, procurement or local authority follow-on.
- Greater Jakarta & West Java: Check nearby site exposure, access disruption and continuity arrangements.

## OUTLOOK: NEXT SEVEN DAYS

---

The coming week most likely follows the current pattern, led by government-stability concerns, with fires also likely to recur. Key locations to watch: Banten and East Java.

Escalation triggers: a spread of high-severity or casualty-bearing incidents beyond the locations above, and flashpoints around fuel-subsidy and minimum-wage decisions, student and labour mobilisation, election dates and natural-hazard episodes.

Concern would ease with a sustained quiet stretch across Banten and East Java, no further high-severity or casualty-bearing incidents, and no spread to new districts. Were the picture to deteriorate, expect direct disruption to movement and site access at the affected locations, with knock-on delays to staff travel and logistics.

### ESCALATION INDICATORS

- Larger or coordinated protest mobilisation, or labour action spreading to key sites and corridors
- Further casualty-bearing or higher-severity violence at or near operating sites
- Spread of incidents beyond Greater Jakarta & West Java and Central & East Java into new districts

## POLESTAR VIEW

---

Polestar assesses that operating risk in Indonesia is deteriorating, driven by policing and regulatory activity, fire and explosion incidents and natural-hazard disruption. The main business exposure is regulatory compliance, freedom of movement and business continuity. The most exposed areas are Greater Jakarta & West Java, Central & East Java and Sumatra. The most likely disruption over the next seven days is regulatory or policing follow-on affecting operations. The assessment would worsen if larger-scale incidents, casualty-bearing violence or sustained disruption emerge around fuel-subsidy and minimum-wage decisions, student and labour mobilisation, election dates and natural-hazard episodes. For now, operators should tighten movement planning and site protection at the exposed locations and keep contingency arrangements under active review.
