

POLESTAR APAC WEEKLY

POLESTAR INSIGHTS

REPORTING PERIOD: 15 SEPTEMBER 2026 - 21 SEPTEMBER 2026

REGIONAL OUTLOOK

Eastern Japan is this week's clearest business exposure because Typhoon Dujuan is already bringing heavy rain and transport disruption into a large operating market. That creates immediate friction for staff movement, deliveries and time-sensitive services even before any wider knock-on effects are known.

A different operating strain is emerging in Nepal, where a severe LPG shortage linked to import failures points to a slower but broader constraint on fuel-dependent activity. By contrast, the Kohat police headquarters attack in Pakistan is the week's sharpest security signal, but any spillover into commercial access or wider operations remains unconfirmed from the reported facts.

WEEK AT A GLANCE

MATERIAL DEVELOPMENTS	MARKETS REQUIRING WATCH	HIGH OR EXTREME DEVELOPMENTS	7-DAY WATCH ITEMS
6	6	1	4

REGIONAL RISK PICTURE

The most direct transmission into business activity comes from weather-linked transport disruption. In eastern Japan, heavy rain and disrupted transport can immediately delay commuting, field activity and scheduled cargo movements. Sri Lanka's landslide and flooding on Thailand's Highway 401 show the same mechanism on a narrower geographic scale: road access is curtailed, so journey times, routing and site reachability become operational issues.

Nepal's LPG shortage works differently. It is not a sudden closure event, but a fuel-availability problem tied to import failures, which can constrain routine operations and distribution if the planned daily gas-bullet imports do not ease supply.

Cyber and security exposures are more conditional this week. The LTFRB platform outage confirms digital service disruption and a possible data-exposure issue, but it does not establish wider transport stoppages. The Kohat attack demonstrates acute security risk at a police site; any business-access disruption beyond that would need separate confirmation.

KEY DEVELOPMENTS

PAKISTAN | KOHAT KOHAT POLICE HEADQUARTERS ATTACKED

Security · Extreme · 18 Sep 2026

ASSESSMENT: An explosion and gun attack hit a police headquarters in Kohat, and the death toll rose to at least 31 including 16 police personnel. Fighting was still ongoing when the toll was reported.

POLESTAR VIEW: The attack shows acute local security stress. Broader commercial disruption remains a contingent risk, not an established operating outcome from the confirmed reporting.

7-DAY INDICATOR: Watch for official confirmation of any cordons, access restrictions or service suspensions beyond the police-headquarters area.

JAPAN | EASTERN JAPAN TYPHOON DUJUAN DISRUPTS EASTERN TRANSPORT

Weather & Natural Hazards · Moderate · 21 Sep 2026

ASSESSMENT: Typhoon Dujuan was approaching eastern Japan with heavy rain and transport disruption.

POLESTAR VIEW: This is the week's most direct regional business disruption because transport impacts are already reported. The scale of prolonged interruption is still unresolved.

7-DAY INDICATOR: Watch for reports of broader transport suspensions or evidence that disruption remains limited despite the approaching typhoon.

NEPAL NEPAL LPG SHORTAGE PERSISTS

Energy · Moderate · 20 Sep 2026

ASSESSMENT: Nepal is facing a severe LPG shortage linked to import failures. Nepal plans to import 160 gas bullets daily to ease the shortage.

POLESTAR VIEW: The shortage is a direct operating constraint, but the planned daily gas-bullet imports could ease pressure if implementation is visible.

7-DAY INDICATOR: Watch for evidence that the planned 160 daily gas-bullet imports are being executed and improving availability.

PHILIPPINES**LTFRB PLATFORM GOES OFFLINE**[Cyber](#) · [Moderate](#) · 19 Sep 2026

ASSESSMENT: LTFRB is probing a data breach after its platform went offline.

POLESTAR VIEW: Confirmed impact is platform downtime during a breach probe. Data exposure and wider transport-service effects remain unconfirmed from the supplied facts.

7-DAY INDICATOR: Watch for restoration of the LTFRB platform or official clarification on the scope of compromised data.

SRI LANKA | HATTON BOGAWANTALAWA ROUTE**LANDSLIDE CUTS HATTON BOGAWANTALAWA ROUTE**[Weather & Natural Hazards](#) · [Moderate](#) · 21 Sep 2026

ASSESSMENT: A landslide cut off the Hatton Bogawantalawa Route and disrupted Hill Country journeys.

POLESTAR VIEW: The disruption is clearly local but directly affects overland movement. Duration will determine whether it stays a scheduling issue or becomes a service bottleneck.

7-DAY INDICATOR: Watch for official reopening updates or confirmation that alternate routes are carrying traffic.

THAILAND**FLOODING BLOCKS HIGHWAY 401**[Weather & Natural Hazards](#) · [Moderate](#) · 19 Sep 2026

ASSESSMENT: Heavy rain caused flooding along Highway 401 in Surat Thani, leaving the road impassable for small vehicles. Authorities evacuated Thai and foreign tourists from the affected area.

POLESTAR VIEW: The business effect is a specific road-access problem. Broader disruption depends on whether flooding spreads or persists beyond the affected corridor.

7-DAY INDICATOR: Watch for reopening of Highway 401 to small vehicles or reports of continuing impassability.

BUSINESS IMPLICATIONS

Operations teams should prepare temporary schedule compression and remote-work substitutions where travel depends on disrupted transport or blocked roads. That decision is grounded in Typhoon Dujan's impact in eastern Japan, the Hatton Bogawantalawa route cutoff in Sri Lanka and flooding that left small vehicles unable to use Highway 401 in Surat Thani.

Logistics managers should review fuel-dependent delivery plans and prioritize essential loads if Nepal's LPG shortage persists. The trigger is the confirmed severe shortage linked to import failures, while the planned 160 daily gas-bullet imports are the main near-term sign of relief rather than proof of normalization.

IT and compliance teams should route any LTFRB-dependent transactions through manual contingencies and assess exposure to delayed regulatory processing while the platform remains offline. The immediate trigger is the confirmed outage during a data-breach probe; wider effects on transport activity or data compromise are still uncertain.

7 DAY WATCH

27 Sep 2026 | ISLAMABAD, PAKISTAN – Planned PTI protest march

Why it matters: Movement and access in Islamabad, Pakistan may be affected by the scheduled activity.

Watch: Track route and venue advisories, transport changes and police restrictions.

24 Sep 2026 | JAKARTA, INDONESIA – Planned Farmers' Day demonstrations

Why it matters: The planned gathering may affect access or security around Jakarta, Indonesia.

Watch: Track venue advisories, organiser confirmation and any police restrictions.

24 Sep 2026 | JAKARTA, INDONESIA – Possible KPSI employment-bill demonstration

Why it matters: The planned gathering may affect access or security around Jakarta, Indonesia.

Watch: Track venue advisories, organiser confirmation and any police restrictions.

28 Sep 2026 | INDIA – Planned banking strike

Why it matters: Branch and transaction services in India may be affected by the planned banking strike.

Watch: Check banks' branch and payment-service advisories before time-sensitive transactions.

POLESTAR OUTLOOK

The most important unresolved risk is whether Japan's current transport disruption broadens beyond short-term delays into sustained operational interruption. The decision would change if authorities report wider service suspensions or, conversely, if transport disruption remains limited despite the heavy rain.
