

CARGO WATCH

POLESTAR INSIGHTS

REPORTING PERIOD: 10 JUNE 2026 - 9 JULY 2026

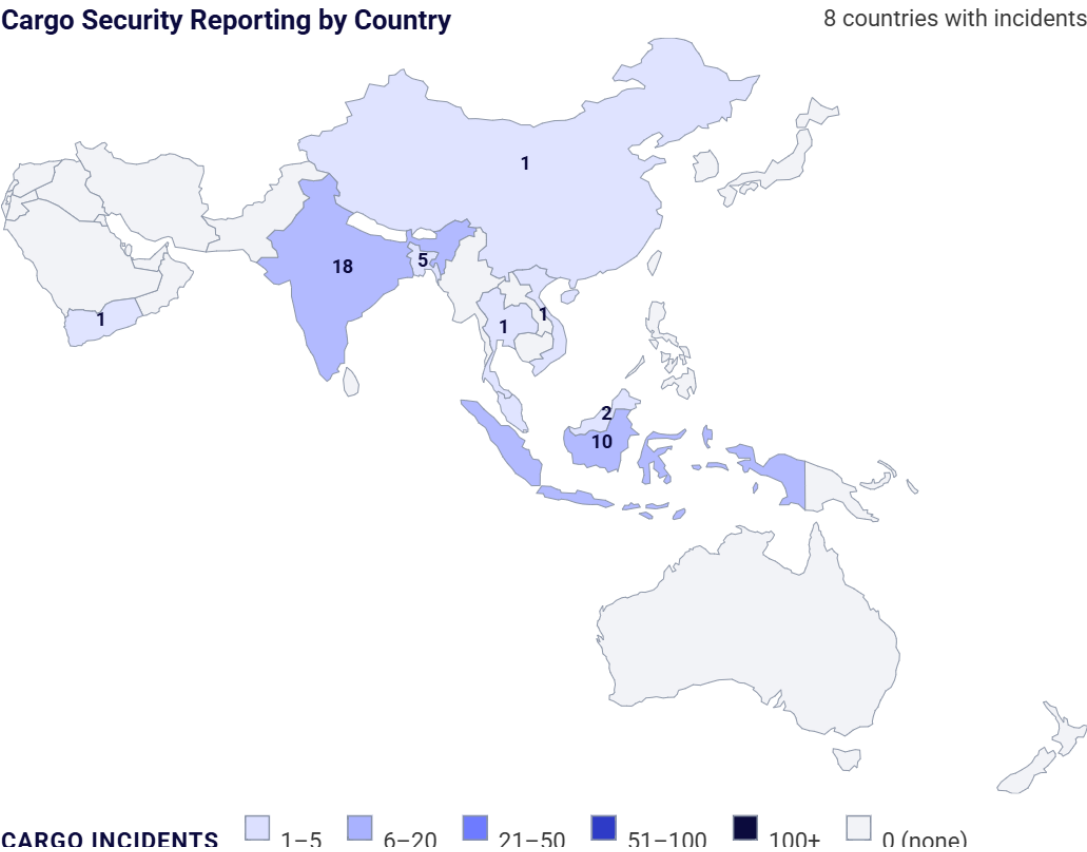

EXECUTIVE SUMMARY

Cargo-security reporting this period centred on inland transport activity, with cargo theft in transit and warehouse theft the clearest drivers of exposure. Reporting was most concentrated in India. Overall severity was predominantly moderate, with a minority of events reaching high severity. This keeps route security and driver integrity the main operational priority, with route planning and on-water escort and watch the controls most in need of reinforcement across the region.

FAST FACTS

REPORTING PERIOD 10 Jun - 9 Jul 2026	TOTAL RECORDS 39 Cargo Watch this period	HIGHEST SEVERITY High Highest rating this period
TOP ISSUE TYPE Cargo theft in transit 24 records	MOST AFFECTED COUNTRY India 18 records	LATEST INCIDENT 08 Jul 2026

CARGO SECURITY REPORTING BY COUNTRY

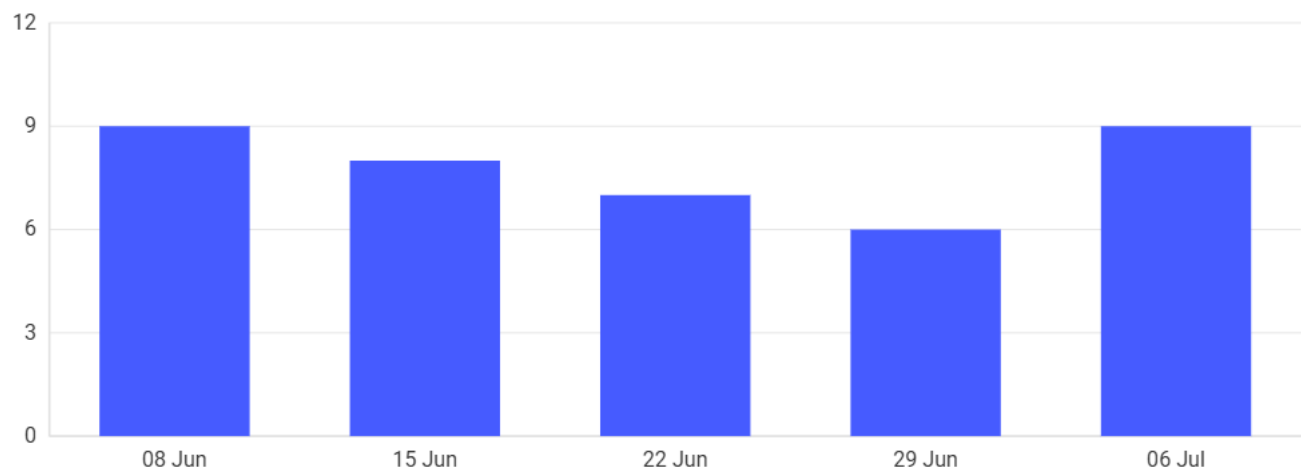

Reporting was concentrated in India (46% of located incidents).

WEEKLY TREND AND ACTIVITY

Weekly Cargo Theft Trend

39 records across 5 weeks

In-scope cargo incidents per week 08 Jun to 06 Jul

Activity increased during the final reporting week driven mainly by inland transport incidents.

Weekly Activity by Pattern

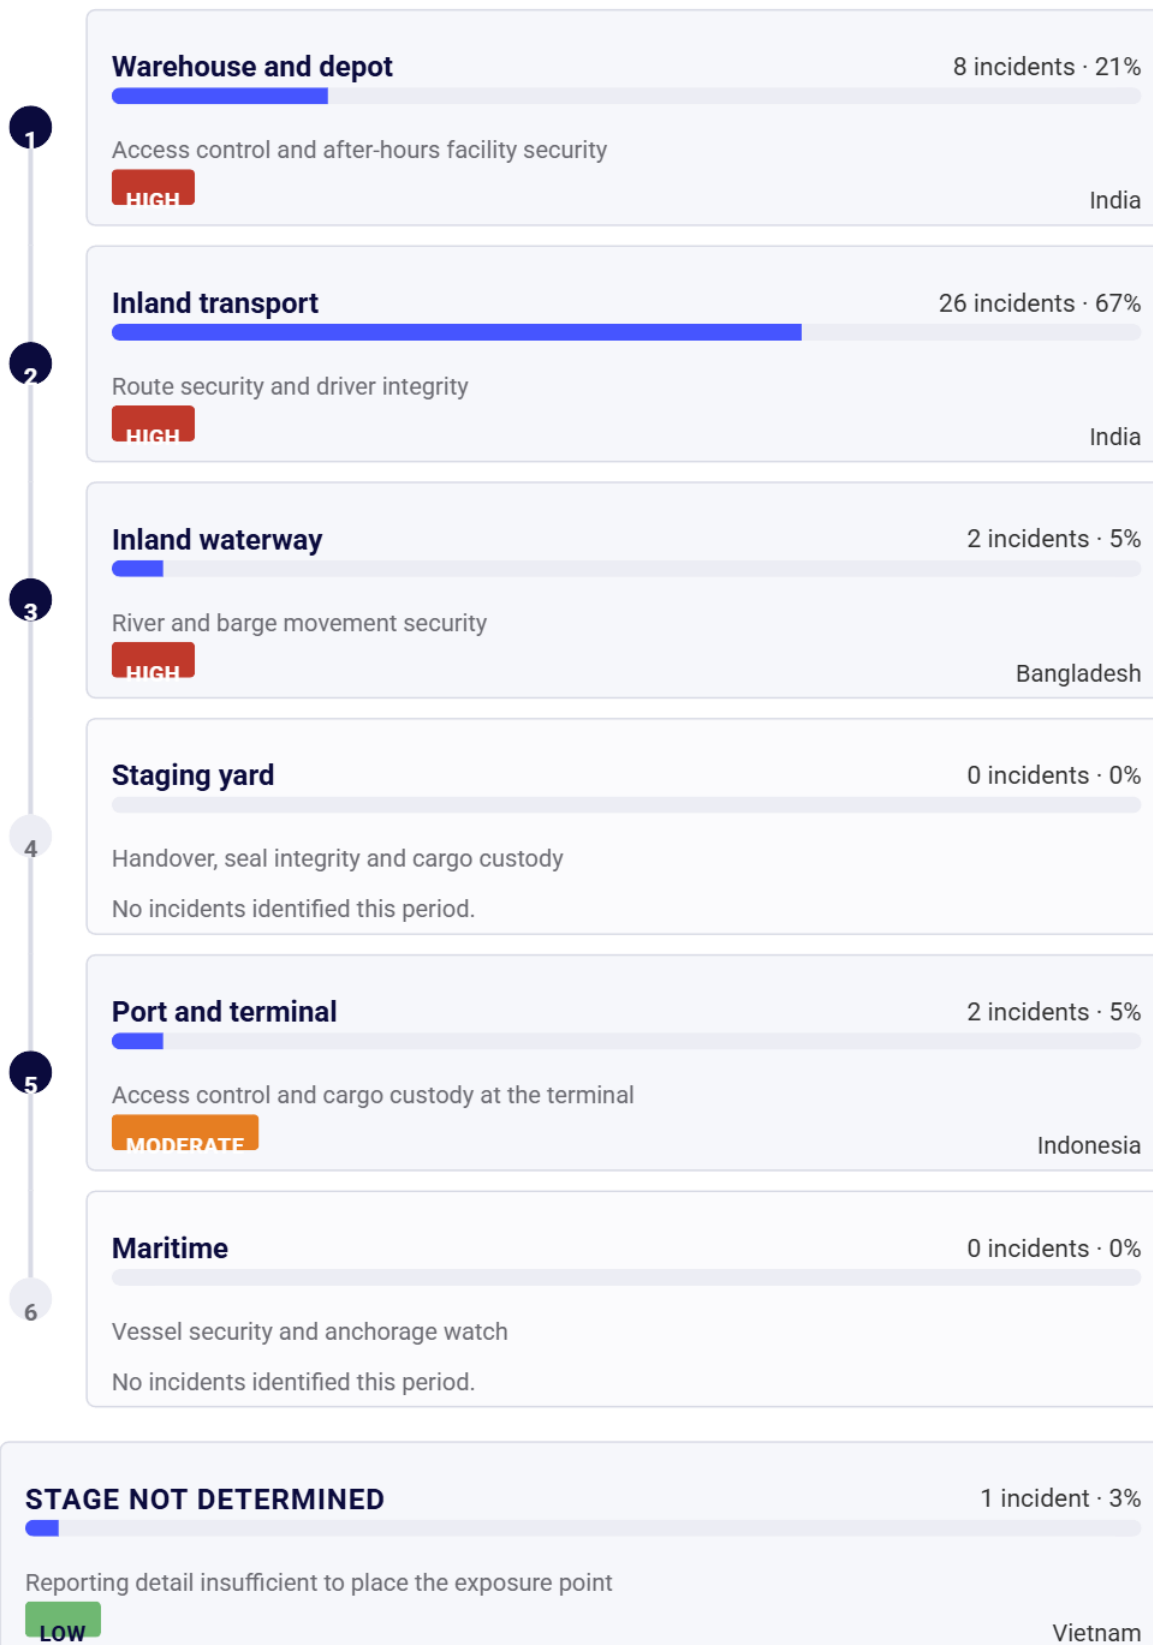

Pattern	10 Jun–14 Jun	15 Jun–21 Jun	22 Jun–28 Jun	29 Jun–5 Jul	6 Jul–9 Jul
Warehouse and depot	1	2	1	0	4
Inland transport	7	5	5	5	4
Inland waterway	0	1	0	0	1
Staging yard	0	0	0	0	0
Port and terminal	1	0	0	1	0
Maritime	0	0	0	0	0
Other or unattributed	0	0	1	0	0
Weekly total	9	8	7	6	9

Reporting spread across the period, with inland transport the most frequently reported pattern.

Cell shading reflects reporting frequency, not severity – a stronger blue means more incidents were reported in that pattern and week.

Supply-Chain Exposure

Where this period's cargo incidents fall across the movement chain.

Share is each stage's percentage of the period's unique incidents.

Operational Patterns

Leading incident types within the broader supply chain exposure.

Cargo theft in transit

HIGH

24 incidents · 62% of total · Primary country: India

Concern: River and barge movement security

Route planning On-water escort and watch

Cargo custody in transit Jetty access control

Watch: Repeat hits on the same river route, jetty or barge operator. Focus: India.

Warehouse theft

HIGH

8 incidents · 21% of total · Primary country: India

Concern: Access control and after-hours facility security

Perimeter security CCTV and alarms

Guarding Access control

Watch: Repeat intrusion at the same facility, operator or after-hours window. Focus: India.

Container theft (inland)

MODERATE

2 incidents · 5% of total · Primary country: Indonesia

Concern: Route security and driver integrity

Route planning Driver vetting

In-transit tracking Escort protocols

Watch: Repeat hits on the same corridor, operator or load type. Focus: Indonesia.

Share is each pattern's percentage of the period's unique incidents.

ENFORCEMENT ACTIVITY

8 enforcement outcomes reported this period (arrests, seizures or recoveries), shown separately and excluded from the incident totals above.

SITUATION

Cargo exposure this period was led by inland transport activity and concentrated in India, with cargo theft in transit and warehouse theft the clearest patterns.

WHAT MATTERS

- Cargo theft in transit centred on India: this matters because it directly stresses river and barge movement security, raising exposure for cargo owners.

IMPLICATIONS

- The reported warehouse theft in Indonesia confirms warehouse and depot as a live exposure point for affected consignments.

WATCH NEXT

- Repeat hits on the same river route, jetty or barge operator.

KEY INCIDENTS

POLESTAR VIEW

Cargo-security exposure this period is inland transport-led and concentrated around India, and most consistent with opportunistic, financially motivated theft, not a coordinated or politically driven campaign. The data supports a picture of cargo theft in transit and warehouse theft affecting inland transport exposure, with moderate severity most common and losses on cargo owners and logistics providers. It does not support claims of an organised cross-border network, a confirmed insider or seal-compromise dimension, or a statistically meaningful surge, none of which the records establish. Reporting is drawn from open sources with only partial enrichment: loss values, cargo types and movement stage are frequently unstated, so totals and shares are indicative, not exhaustive. In the near term, further inland transport incidents of a similar character are likely in and around India, absent a change in local enforcement or operators' own measures. Overall analytical confidence is moderate to high, reflecting corroborating volume against open-source and enrichment limitations.
