

FERTILISER WATCH

POLESTAR INSIGHTS

REPORTING PERIOD: 16 MAY 2026 - 22 MAY 2026

POLESTAR-ADVISORY.COM

DATA STATUS: STATIC / IMPORT ONLY

LATEST RECORD: 22 MAY 2026

LAST UPDATED: 23 MAY 2026

EXECUTIVE SUMMARY

Fertiliser pressure was led by shortage and supply chain disruption. India carried the strongest country signal, supported by Indonesia and Japan. Severity peaked at extreme.

FAST FACTS

REPORTING PERIOD 16 May - 22 May 2026	TOTAL RECORDS 13 Fertiliser in window	HIGHEST SEVERITY Extreme Worst rating in window
TOP ISSUE TYPE Multiple fertiliser incident types Data quality issue	MOST AFFECTED COUNTRY Country not identified Coverage gap	LATEST INCIDENT 22 May 2026

SITUATION

Supply, price and export decisions stay front of mind, currently expressed through shortage and supply chain disruption. The chain runs from input price into farm output and onward food cost.

WHAT HAPPENED

Activity centred on shortage and supply chain disruption. Reporting clustered around India, Indonesia and Japan. Severity peaked at extreme.

WHAT MATTERS

Movement in fertiliser pricing and supply rolls forward into planting decisions, farm input cost and the wider food security read. Exposure to India matters most for forward stock cover and supplier conversations.

IMPLICATIONS FOR BUSINESS

- Walk through supplier diversification, forward stock cover, exposure to single-source urea and potash, and contingency for export-ban announcements.

WATCH NEXT

- Keep eyes on export restrictions, plant maintenance and outage announcements, farmer protest activity and any government subsidy moves.

The standing concern is supply continuity rather than the volume of headlines. India is the country to watch when planning forward cover.
