

CARGO WATCH

POLESTAR INSIGHTS

REPORTING PERIOD: 25 APRIL 2026 - 24 MAY 2026

POLESTAR-ADVISORY.COM

DATA STATUS: MANUAL SCRAPER LATEST RECORD: 21 MAY 2026 LAST UPDATED: 30 MAY 2026

EXECUTIVE SUMMARY

Cargo loss across the window was shaped by theft and loss, truck hijack and container theft. Indonesia carried the most consistent reporting, alongside Papua New Guinea and Malaysia. Severity peaked at high.

FAST FACTS

REPORTING PERIOD 25 Apr - 24 May 2026	TOTAL RECORDS 31 Cargo Watch in window	HIGHEST SEVERITY High Worst rating in window
TOP ISSUE TYPE Cargo theft / loss 12 records	MOST AFFECTED COUNTRY Country not identified Coverage gap	LATEST INCIDENT 15 May 2026

CARGO SECURITY READ

Route-side and convoy cargo risk shows up across 20 qualifying records this cycle, covering truck hijack, container theft, in-transit loss and similar operational crime. The lead entry is "Police Bust Cargo Theft Syndicate at Soekarno-Hatta Airport", filed 13 May 2026. Country attribution in the window is led by Unknown (4), Papua New Guinea (3) and Malaysia (3).

Watch for clustering on specific corridors, repeat operator names in the same week and any escalation from pilferage to coordinated hijack. Insurance loss bulletins and transport-association advisories are the cleanest early signals that route-side risk is firming.

LOGISTICS HUB READ

Logistics hub risk across warehouses, depots, distribution centres, terminals and bonded storage appears across 8 qualifying records this cycle. The lead entry is "Industrial-zone warehouse theft in Sorong, Polres investigating organised crew", filed 11 May 2026. The country picture in this cycle is led by Indonesia; West Papua (1), Vietnam (1) and Australia (1).

Watch for repeat incidents at the same facility or operator, escalation from pilferage to organised raids, and any insurance-premium movement on affected corridors. Hub-side losses typically precede a hardening of underwriting terms by one to two cycles.

SITUATION

Warehouse, depot and road corridors hold the live exposure, currently visible in truck hijack, warehouse theft and container theft. Indonesia sits at the centre of the recurring geography.

WHAT HAPPENED

The dominant patterns were truck hijack, warehouse theft and container theft. Loss reporting concentrated on Indonesia, Papua New Guinea and Vietnam. Severity peaked at high.

WHAT MATTERS

Loss in this category lands directly on supply chain continuity, insurance exposure and the cost of moving goods through repeat corridors. Repeat geography in Indonesia, Papua New Guinea and Vietnam points to known modus operandi rather than isolated events.

IMPLICATIONS FOR BUSINESS

- * Review routing, escort use on high-value moves, depot access controls, seal and lock checks at handover, and insurance cover for repeat corridors. Cross-check supplier vetting on yard staff and contracted drivers.

WATCH NEXT

- * Look for copycat losses on the same corridor inside two weeks of a reported event, fresh arrests or recoveries, and route shifts that quietly push volume through weaker depots.

POLESTAR VIEW

Insider knowledge and route familiarity continue to drive the larger losses. Indonesia, Papua New Guinea and Vietnam hold the recurring geography; Indonesia is the lead pressure point.
