

PAPUA

POLESTAR INSIGHTS

REPORTING PERIOD: 24 MAY 2026 - 30 MAY 2026

DATA STATUS: MIXED SOURCES (LIVE, MANUAL & STATIC)

LATEST RECORD: 21 MAY 2026

LAST UPDATED: 23 MAY 2026

COVERAGE WARNING

1 of 4 collection sources feeding Papua is currently failing or out of date, so the empty 7-day window reflects a coverage problem rather than confirmed quiet. The operating picture is unconfirmed; read the 30 and 90-day context sections below for the standing risk pattern.

EXECUTIVE SUMMARY

Papua (Indonesian West Papua) is a restricted-reporting, high-friction operating environment spanning the six provinces of the Indonesian half of New Guinea. No relevant incidents were recorded in the 7-day window. That is normal for a region where foreign press and NGO access is tightly controlled — read it as a coverage gap, not a calm operating picture. The standing operational signature — student and church-led protest out of Jayapura and Manokwari, TNI/POLRI security operations in the central highlands, TPNPB-OPM armed-group activity around Nduga, Intan Jaya and the Freeport Grasberg corridor at Timika, and severe highland access constraints — is carried in the 30-day and 90-day context sections below as background pattern, not as fresh weekly activity.

FAST FACTS

REPORTING PERIOD 24 May - 30 May 2026	TOTAL RECORDS 0 No records in the weekly window	HIGHEST SEVERITY —
MOST AFFECTED AREA —	LATEST INCIDENT —	MAIN ISSUE TYPE —

SITUATION

Papua is shaped by a long-running low-intensity insurgency, recurring student and church-led protest over Jakarta's security and resource policy, heavy TNI/POLRI deployment across the highlands, and extreme geographic isolation — these are the standing operating picture, not this week's events. No relevant incidents were recorded in the 7-day window. Treat the silence as a feature of restricted reporting access rather than a clean operating picture. The named risks above and anything older than seven days sit in the 30 / 90-day context sections below and should not be read as current activity.

WHAT HAPPENED

Nothing fresh landed in the current 7-day window. The 30-day and 90-day context sections below carry the wider pattern — protest activity around Jayapura and Manokwari campuses and commemoration dates, highland security operations and TPNPB-OPM clashes, and resource-corridor friction around the Timika–Tembagapura (Freeport) and Bintuni (Tangguh LNG) belts — but those are background, not current activity. Treat them as standing-risk reference, not as something that happened this week.

WHAT MATTERS

The absence of records does not mean an absence of activity. Source coverage in this window was thin, so any forward read should treat the operating picture as unconfirmed rather than calm.

IMPLICATIONS FOR BUSINESS

- Confirm Surat Jalan / travel-permit status before any movement into the highlands; access can be withdrawn at short notice during security operations.
- Plan highland and interior travel by air via Sentani, Timika, Wamena, Manokwari or Sorong; treat road movement on the Trans-Papua corridor as weather- and security-dependent.
- Hold heightened journey management around Jayapura and Manokwari campuses and government sites on commemoration dates (1 May, 1 December, 19 December) and during student protest cycles.
- For resource-sector footprints, confirm convoy security and TNI/POLRI and contracted-security coordination on the Timika-Tembagapura (Freeport) and Bintuni Bay (Tangguh LNG) corridors.
- Build in tolerance for internet shutdowns and cellular blackspots; carry HF/VHF or satellite comms for highland and interior work.
- Confirm out-of-province medevac arrangements (Makassar / Jakarta / Singapore); in-province tier-1 care is not available and highland evacuation is weather-dependent.
- Treat thin weekly reporting as restricted access, not low risk; cross-check local-language and church / NGO sources before standing down posture.

LOCATION WATCHLIST

LOCATION	NOTE	7D	30D	90D	WORST (90D)
Jayapura	Provincial capital, university protest focal point	0	7	24	HIGH
Sorong	Southwest Papua, LNG and port hub	0	4	8	MODERATE
Manokwari	West Papua capital, Tangguh corridor	0	2	4	MODERATE
Timika / Mimika (Freeport belt)	Grasberg copper-gold corridor, armed-group threat to convoys	0	4	11	EXTREME
Wamena (Baliem Valley)	Highland Papua, weather-dependent access	0	4	11	EXTREME
Nduga / Intan Jaya / Puncak	Active TPNPB-OPM operating area	0	7	18	EXTREME
Merauke	South Papua agribusiness corridor	0	2	2	LOW
Nabire	Central Papua, coastal staging point	0	0	1	LOW
PNG border districts	Keerom / Pegunungan Bintang / Boven Digoel cross-border movement	0	0	0	No records
Highlands airstrips	Sentani (DJJ), Timika (TIM), Sorong (SOQ), Manokwari (MKW), Wamena (WMX)	0	5	17	EXTREME
Trans-Papua highway corridor	Partially built, wet-season landslide closures	0	0	0	No records

30-DAY CONTEXT

Across the rolling 30-day context window Papua carries 39 records, with 39 records sitting outside the current 7-day cycle.

BACKGROUND OPERATING PICTURE

Across the rolling 90-day background window Papua carries 102 records, 63 of which sit beyond the 30-day context. Use them to size the background operating picture rather than to direct current movement decisions.

MAP

Extreme High Moderate Low Insignificant Leaflet | (c) OpenStreetMap (c) CARTO

Records without coordinates are included in totals and tables but not plotted on the map.
The map reflects the active reporting window — 0 7-day records. It is not the full risk picture — read it alongside the 30 / 90-day context sections above.

SEVERITY DISTRIBUTION

No incidents in the active window to chart.

INCIDENT BREAKDOWN BY TYPE

No classifiable incident types in the active window.

WATCH NEXT

- Renewed student or church-led protest out of Jayapura, Manokwari or Sorong, especially around commemoration dates.
- TNI/POLRI security operations or TPNPB-OPM clashes in Nduga, Intan Jaya, Puncak, Puncak Jaya or Yahukimo.
- Armed-group activity or convoy incidents on the Timika–Tembagapura (Freeport Grasberg) corridor.
- Labour or indigenous-rights friction around the Tangguh LNG / Bintuni Bay belt and South Papua plantation concessions.
- Highland access disruption — landslide closures on the Trans-Papua corridor, weather-grounded airstrips or operation-driven district lockdowns.
- Internet or communications shutdowns imposed in response to unrest.
- Cross-border movement or refugee flows on the Keerom / Pegunungan Bintang / Boven Digoel frontier with Papua New Guinea.

POLESTAR VIEW

Papua should be treated as a restricted-reporting, high-friction operating environment where a quiet week reflects access limits, not low risk. No relevant incidents were recorded in the 7-day window. The standing concerns — highland insurgency and security operations, protest cycles in the coastal cities, and resource-corridor exposure at Freeport and Tangguh — sit in the 30 / 90-day context as background pattern, not current activity. Business users should focus on permit and movement discipline, air-first highland travel, resilient communications and clear out-of-province medevac triggers.

RELATED INCIDENTS

No related incidents recorded for Papua in the active window.
