

FUEL WATCH

POLESTAR INSIGHTS

REPORTING PERIOD: 19 MAY 2026 - 25 MAY 2026

FAST FACTS

Fuel Watch is missing required market data. Add Brent, WTI and jet fuel data before export. Missing: Brent crude price, WTI crude price, Jet fuel indicator.

No supply, policy or route indicators supplied.

JET FUEL PRICE TRAJECTORY

Jet fuel benchmark

Jet fuel trajectory data is not available for this reporting cycle.

OPERATIONAL READ

The dominant operational themes in this window are chokepoint pressure and tanker-route disruption (13 records); pump and surcharge pricing pressure (3 records); shortages, rationing and forecourt disruption (3 records). Dependent fuel movement is forced onto longer, costlier cycles even when the underlying barrels are still available.

Watch for fresh advisories, vessel reroutes and any naval movement that signals escalation. Watch for surcharge revisions on freight contracts and any government push-back against price rises. Iran, India, Pakistan carry the strongest operational signal this cycle.

REGIONAL HIGHLIGHTS

Iran is the clearest pressure point in this window. 7 records this cycle point to chokepoint pressure and tanker-route disruption. Route pressure on Hormuz, Bab-el-Mandeb or the Red Sea feeds straight into bunker cost, transit time and war-risk premium. Watch for fresh advisories, vessel reroutes and any naval movement that signals escalation.

India carries a secondary but credible signal. 4 records this cycle point to shortages, rationing and forecourt disruption. Pump-price moves, forecourt disruption and transport cost are where this lands first; local movement and distribution economics absorb the shock before the published headline catches up. Watch for state-level fuel-tax changes, fresh forecourt or rationing reports and any operator-side surcharge announcements on road and rail.

Pakistan adds further weight to the picture. 4 records this cycle point to chokepoint pressure and tanker-route disruption. Availability, pricing and power resilience are the operational pressure points here; fuel for generators, freight and field operations is where the cycle hurts before it shows up in macro data. Watch for load-shedding patterns, depot-stock advisories and any government action on fuel pricing or commercial allocation.

PRODUCER AND BUYER ACTIONS

ACTOR	CATEGORY	ACTION	OPERATIONAL READ
ADNOC	Producer action	ADNOC CEO Says Hormuz Oil Flows May Not Fully Recover Before 2027 21 May 2026	Supply-side move with read-through to bunker, jet and downstream pricing if the action sustains.
Reliance	Government / policy action	Parliamentary caucus warns against using fuel levy as revenue measure 22 May 2026	Policy reset: review pump-price exposure and contract pass-through clauses before the next billing cycle.
Government / policy	Government / policy action	Govt reduces petrol by Rs6 per litre, high-speed diesel by Rs6.8 22 May 2026	Policy reset: review pump-price exposure and contract pass-through clauses before the next billing cycle.

ACTOR	CATEGORY	ACTION	OPERATIONAL READ
ADNOC	Infrastructure / routing action	UAE crude oil pipeline bypassing Hormuz 50% complete, ADNOC says 20 May 2026	Logistics rerouting raises bunker and transit cost on dependent fuel flows.
ADNOC	Infrastructure / routing action	New UAE Pipeline Bypassing Hormuz Now 50% Complete, ADNOC CEO Says 20 May 2026	Logistics rerouting raises bunker and transit cost on dependent fuel flows.
