CHOKEPOINT / ROUTE READ

The 30-day picture is led by Strait of Hormuz, which carries 194 qualifying records and a highest severity of extreme. Arabian / Persian Gulf follows with 4 records.

Inside the weekly briefing window, 6 records pointed at transit, diversion or advisory pressure - a tighter view of what shippers actually felt across the cycle.

Watch for new naval advisories on Strait of Hormuz, any war-risk premium adjustments and operator commentary on rerouting. Those are the early indicators of escalation; commercial freight rates lag them by days.

CHOKEPOINT WATCH, LAST 30 DAYS (25 APR - 24 MAY 2026)

CHOKEPOINT	RECORDS	HIGHEST SEV	LATEST	OPERATIONAL READ
Strait of Hormuz	194	EXTREME	22 May 2026	Reporting was led by "Iran proposes permanent toll for Strait of Hormuz shipping", with 194 qualifying records over the last 30 days.
Gulf of Oman	2	EXTREME	15 May 2026	Reporting was led by "Two India-Bound LPG Tankers Clear Hormuz in Dark Mode", with 2 qualifying records over the last 30 days.
Arabian / Persian Gulf	4	EXTREME	07 May 2026	Reporting was led by "Strait of Hormuz traffic drops to 14 ships, with most leaving Persian Gulf: CAS", with 4 qualifying records over the last 30 days.
Red Sea	1	LOW	07 May 2026	Activity here was anchored by a single entry, "Drewry: Suez Canal Containership Crossings Recover", over the last 30 days.
Bab el-Mandeb	1	EXTREME	01 May 2026	Low-confidence reporting only; no validated maritime advisory or credible operational incident identified in the last 30 days.
Malacca Strait	0	-	-	Quiet over the last 30 days; no qualifying activity on file.

VESSEL THREAT AND PIRACY READ

Hostile activity against vessels over the last 30 days runs to 12 records, of which 26 are an attack or seizure rather than a softer boarding or approach. The lead entry is "UKMTO Reports Vessel Seized by Unauthorized Personnel Near Strait of Hormuz - News and Statistics - IndexBox". Piracy and armed-robbery reporting carries 2 records across the same window, with "Armed robbers board bulk carrier in Singapore Strait" as the lead entry.

Inside the weekly briefing cycle itself, no fresh vessel-side or piracy records were filed; the read leans on the trailing 30-day picture.

Track maritime advisories, naval-force statements and any movement in war-risk or P&I premiums on affected routes. Those are the cleanest early indicators that hostile activity is firming or easing.

VESSEL ATTACKS, LAST 30 DAYS (25 APR - 24 MAY 2026)

DATE	ACT	TITLE	SEVERITY
15 May 2026	Seized	11 Pakistanis, 20 Iranians aboard US-seized vessels repatriated, says DPM Dar	EXTREME
15 May 2026	Seized	UKMTO Reports Vessel Seized by Unauthorized Personnel Near Strait of Hormuz - News and Statistics - IndexBox	EXTREME
14 May 2026	Seized	Vessel seized off UAE coast, moved toward Iranian waters, UKMTO says - Caliber.Az	LOW
14 May 2026	Seized	Vessel seized off UAE coast, headed toward Iranian waters: UK maritime agency - Anadolu Ajans	LOW
14 May 2026	Seized	Vessel seized off UAE coast by unauthorized individuals now heading toward Iranian waters - The New Voice of Ukraine	LOW
14 May 2026	Seized	Vessel seized off UAE and heading toward Iranian waters: UKMTO - The New Arab	LOW
14 May 2026	Seized	UKMTO says Honduran-flagged vessel seized by Iran near UAE - upi.com	LOW
14 May 2026	Seized	Hormuz Crisis: Vessel Seized Off UAE Heading to Iran - Deccan Herald	EXTREME
14 May 2026	Seized	Vessel seized off UAE coast headed for Iranian waters: UK agency - Yeni Safak English	LOW
11 May 2026	Attack	UKMTO reports vessel attack on bulk carrier off Doha - Safety4Sea	LOW
07 May 2026	Attack	Iran claims missile strike on US naval units near Strait of Hormuz after tanker attack by America	EXTREME
06 May 2026	Attack	Cargo vessel struck by projectile at Strait of Hormuz, UKMTO says - ThePrint	LOW

PIRACY AND ARMED ROBBERY, LAST 30 DAYS (25 APR - 24 MAY 2026)

DATE	ACT	TITLE	SEVERITY
05 May 2026	Boarding	Armed robbers board bulk carrier in Singapore Strait	MODERATE
27 Apr 2026	Piracy	Somalia piracy: Another vessel seized as threat level increased - BBC	MODERATE

COMMERCIAL IMPACT ON SHIPPING

No port, freight, insurance or commercial-shipping disruption records reached the file in the weekly window. Pure market commentary - newbuild orders, vessel S&P, fleet finance, earnings, share-price moves - is intentionally excluded from this section, so a blank cycle here means the operational disruption signal was genuinely quiet rather than under-reported.

Watch for fresh port advisories, schedule slippage out of the major box and tanker hubs, and any insurance-premium adjustments tied to specific routes. Those are the next signals that operational commercial pressure is firming.

RECORDS

No port, freight, insurance or commercial-shipping disruption records in the weekly window.

REGIONAL AND COUNTRY VIEW

Across the weekly briefing window, Middle East carries the heavier share with 3 records against 2 for APAC. At country level the cycle is led by Iran (3), China (1) and South Korea (1).

A further 9 records could not be tied to a confirmed incident country and are excluded from the country chart to avoid distortion.

RECORDS BY REGION

RECORDS BY COUNTRY

WHAT MATTERS

The cycle's centre of gravity is Strait of Hormuz, which carries 194 qualifying records ahead of Arabian / Persian Gulf on 4. That matters for routing decisions because every additional advisory tightens transit-time variance and feeds straight into vessel scheduling and bunker planning for any operator with exposure to the region.

Hostile activity against vessels still anchors the risk picture, with 26 attack or seizure records and 2 piracy or armed-robbery entries on file over the trailing 30 days (25 Apr - 24 May 2026). Any operator running through the affected lanes should be reviewing crew-change locations, war-risk and P&I premium exposure, and the threshold at which their advisory partners would recommend re-routing.

Regionally the weekly window leaned on Middle East; country-level concentration is set out in the chart below.

IMPLICATIONS FOR BUSINESS

Operators with route exposure through Strait of Hormuz should be running a live review of vessel scheduling, port-call sequencing and bunker planning against the latest advisory traffic. War-risk and P&I premium adjustments tend to land one to two cycles after the operational signal firms, so the time to size insurance exposure is now rather than after the first underwriting notice.

Crew-change locations should be re-examined for any voyage transiting the affected lanes. The cleanest mitigation is a shift to a safer port of crew change, paired with naval-escort or convoy options where advisory partners support them. Cargo owners should expect higher demurrage and schedule-reliability variance on rerouted strings, and should be writing in flexibility clauses on near-term lifting contracts.

Freight-market commentary stays muted this cycle on the operational definition used here. That can flip quickly: a single port closure or a credible war-risk adjustment can pull surcharges across an entire trade lane within days.

WATCH NEXT

Track fresh naval and maritime advisories on Strait of Hormuz, plus any UKMTO, IMB or coalition-force bulletins. Those move ahead of headline freight rates and signal where pressure is firming.

Watch for war-risk and P&I premium movement on the affected lanes, operator decisions to divert or skip a port call, and any escalation in naval escort or convoy posture. Reliability indices and schedule-reliability monthly bulletins are the cleanest lagging confirmation that the operational signal has converted into commercial pressure.

On vessel and crew risk: monitor crew-change advisories from major manning hubs, any change in flag-state guidance, and whether insurance underwriters extend hostile-area surcharges to adjacent waters. A widening of the hostile-area perimeter is the single clearest sign the threat picture is firming, not easing.

POLESTAR VIEW

Our read on the cycle is that the underlying maritime security picture remains structurally elevated even when the weekly file looks quieter than the trailing 30 days. Strait of Hormuz continues to set the tempo, and operators should be planning against a "quiet weeks, sharp incidents" cadence rather than a sustained easing.

For commercial decisions, the practical implication is that routing, port-call sequencing and crew-change planning should be treated as live risk decisions every cycle - not annual reviews. War-risk and P&I premium movement remains the cleanest single signal that the operational picture is firming; reliability indices and headline freight rates lag it.

Geographically the pressure this cycle sat with Middle East. We expect the same lanes and corridors to set the tempo through the next reporting window unless a fresh naval-force posture change or a credible diplomatic move on the underlying conflicts disrupts the pattern.

SOURCE NOTES / DATA NOTES

Based on records held in the Polestar Workbench at time of export. Records without coordinates may appear in tables and counts but not maps. Severity ratings follow the Polestar five-tier vocabulary: Insignificant, Low, Moderate, High, Extreme.

9 records in the window could not be tied to a confirmed incident country; they are included in total counts but excluded from the country and regional charts to avoid geographic distortion. Vessel flag state is never counted as incident country.
