

THAILAND

POLESTAR INSIGHTS

REPORTING PERIOD: 10 JULY 2026 - 16 JULY 2026

BOTTOM LINE UP FRONT

The assessment centres on fire and explosion incidents, natural-hazard disruption and transport, utility and connectivity disruption. The Thailand operating picture deteriorated this week, with higher-severity reporting across fire and explosion incidents, natural hazards and armed robbery and violent crime. Bangkok Metropolitan Region, Southern Thailand and Northeastern Thailand (Isan) remain the main exposure for staff movement and site continuity. Business users should tighten movement planning, review movement routines and premises security and monitor localised fire, utility and transport disruption and check site continuity.

TOP 3 DEVELOPMENTS

Bar fire in Bangkok kills 28 people, leaves 25 in critical condition

EXTREME

Fire / explosion · Bangkok · Reported 14 Jul 2026 · SinPo.id

Property damage and possible business interruption from fire; verify site safety and continuity arrangements.

Magnitude 2.4 earthquake shakes Phayao, no damage

HIGH

Natural hazard · Phayao · Reported 10 Jul 2026 · Khaosod English

Disruption to access, infrastructure and operations from the natural hazard; check site safety, continuity and staff welfare.

Phuket cracks down on illegal jet skis, fines 23 operators

HIGH

Other security · Phuket · Reported 16 Jul 2026 · Khaosod English

Security-relevant development; monitor for operational follow-on in the affected area.

INCIDENT DETAILS

FIRE & EXPLOSION

Fire and explosion incidents were reported, including fire, concentrated in Bangkok. It was not reported a week earlier, so it reads as newly prominent this period. Business exposure centres on affected premises, the sites immediately around them and their access routes. Fires and explosions cause localised damage and can force evacuation around affected sites.

OTHER OPERATIONAL DISRUPTION

Operational disruption to transport, utilities or connectivity was reported, including transport disruption, concentrated in Bangkok. The most serious reported was Flight pulled over typhoon (Bangkok), assessed as Low severity. Against the previous week the theme is easing. Business exposure centres on transport, power, communications and the operations that depend on them. Disruption of this kind can interrupt operations, logistics and connectivity.

CRIME, THEFT & ROBBERY

Crime, theft and violent incidents were reported, including armed robbery and crime, concentrated in Chiang Rai and Songkhla. The most serious reported was Phayao police arrest man, 65, over underwear theft (Chiang Rai), assessed as Moderate severity. Against the previous week the theme is easing. Business exposure centres on staff safety, premises, vehicles and the secure movement of cash and assets. Incidents of this kind threaten staff, premises and the movement of cash and assets.

CURRENT SITUATION

The assessment centres on fire and explosion incidents, natural-hazard disruption and transport, utility and connectivity disruption. Activity this week concentrated on fire and explosion incidents, natural hazards and armed robbery and violent crime, concentrated around Bangkok Metropolitan Region. Southern Thailand and Northeastern Thailand (Isan). The main business impact is direct exposure to violence and maior

disruption at affected sites. The reporting picture this week reads as broad and deteriorating.

OPERATIONAL IMPACT

Crime, theft & robbery – Direct threat to staff, premises and the movement of cash or assets; harden security, vary routines and brief travellers.

Natural hazards – Weather and geological hazards can interrupt transport, utilities and site access; check conditions before movement and confirm site readiness.

Governance & regulatory – Regulatory, policing and political-stability friction can affect compliance, permits and freedom of movement; monitor official guidance.

Fire & explosion – Fires and explosions cause localised damage and forced evacuation around affected sites; confirm site status before approach.

Other operational disruption – Transport, utilities and connectivity disruption can interrupt operations and logistics; plan for contingencies and alternate routing.

RECOMMENDED ACTIONS

Bangkok Metropolitan Region: Check nearby site exposure, access disruption and continuity arrangements. Escalation trigger – a fire or blast at an industrial, fuel or utility site, or one forcing an evacuation nearby.

Nationally: Check nearby site exposure, access disruption and continuity arrangements. Escalation trigger – a fire or blast at an industrial, fuel or utility site, or one forcing an evacuation nearby.

Southern Thailand: Maintain standard movement and continuity precautions; monitor for operational follow-on. Escalation trigger – a higher-severity or casualty-bearing incident, or repeat activity in the same area.

Northern Thailand: Monitor hazard and flood warnings; check site access, drainage and continuity arrangements. Escalation trigger – an official flood, storm or seismic warning upgrade, or an airport or port closure.

Northeastern Thailand (Isan): Expect security-force activity; confirm road, checkpoint and access status before movement. Escalation trigger – a large security operation, curfew or new checkpoint regime near operating sites.

OUTLOOK: NEXT SEVEN DAYS

The coming week most likely follows the current pattern, led by fires, with natural hazards also likely to recur. Key locations to watch: Bangkok and Phuket.

Escalation triggers: a spread of high-severity or casualty-bearing incidents beyond the locations above, and flashpoints around political mobilisation in Bangkok, southern-border security operations, and seasonal flooding and storm episodes.

Concern would ease with a sustained quiet stretch across Bangkok and Phuket, no further high-severity or casualty-bearing incidents, and no spread to new districts. Were the picture to deteriorate, expect direct disruption to movement and site access at the affected locations, with knock-on delays to staff travel and logistics.

ESCALATION INDICATORS

Further casualty-bearing or higher-severity violence at or near operating sites

Spread of incidents beyond Bangkok Metropolitan Region and Southern Thailand into new districts

Flashpoints around political mobilisation in Bangkok, southern-border security operations, and seasonal flooding and storm episodes

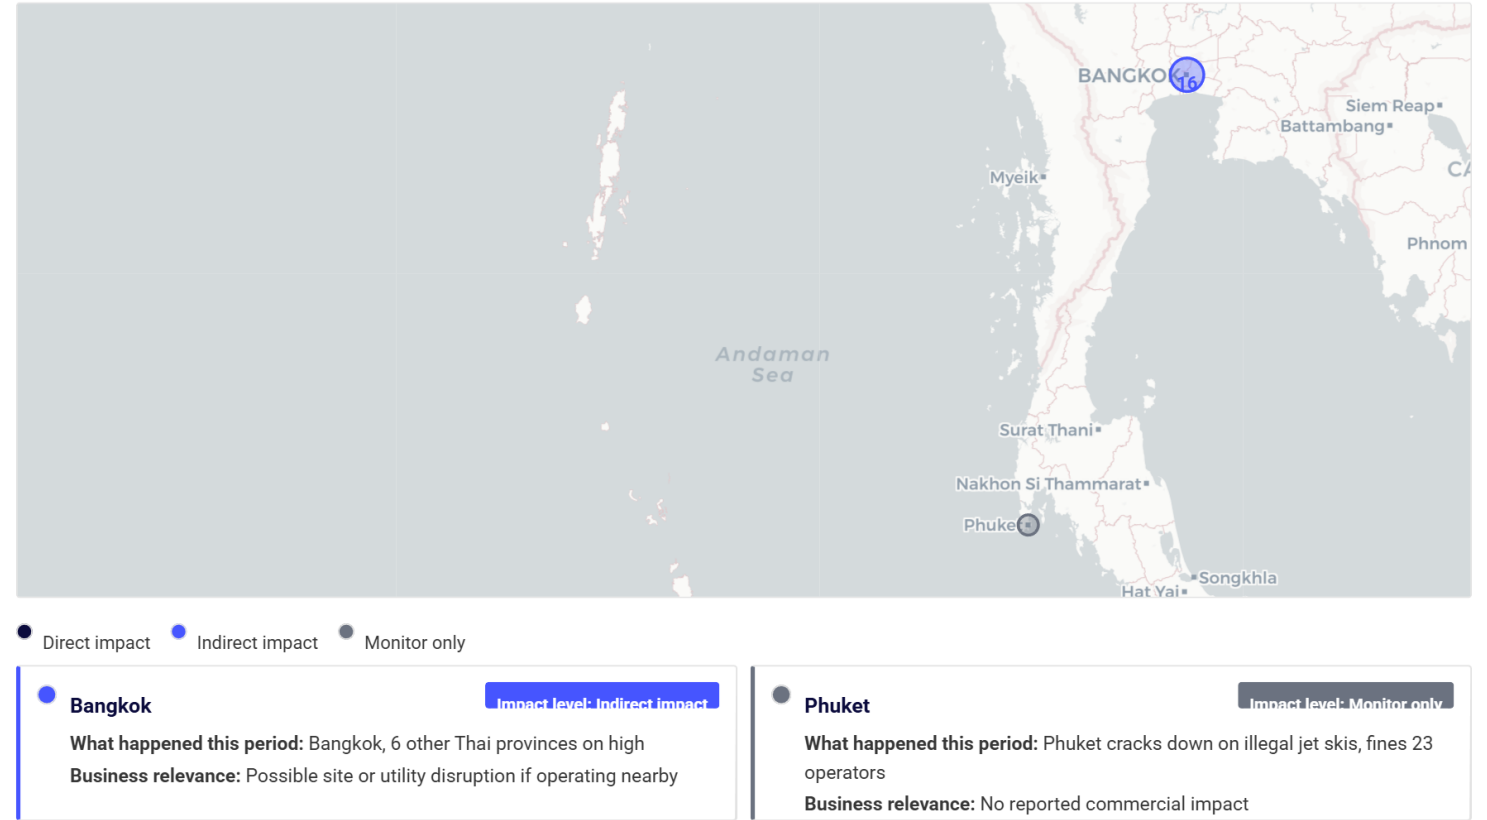

POLESTAR VIEW

Polestar assesses that operating risk in Thailand is deteriorating, driven by fire and explosion incidents, crime and violent incidents and

natural-hazard disruption. The main business exposure is business continuity, site access and staff safety. The most exposed areas are Bangkok Metropolitan Region, Southern Thailand and Northeastern Thailand (Isan). The most likely disruption over the next seven days is further localised fires and continuity disruption around affected sites. The assessment would worsen if larger-scale incidents, casualty-bearing violence or sustained disruption emerge around political mobilisation in Bangkok, southern-border security operations, and seasonal flooding and storm episodes. For now, operators should tighten movement planning and site protection at the exposed locations and keep contingency arrangements under active review.

Operational Map

Reported operational issues this period

Points show reported events at the town or province named in the reporting; where several share a location one marker carries the count. A marker is a town or province-level fix, not an exact point. 12 of 29 records name no specific place and are included in the totals and tables but not plotted.

Map Read

This map shows reported operationally relevant issues for the current reporting period. Not every security or crime incident creates commercial impact. Direct impact is used only where reporting shows a current or confirmed effect on operations, movement, access, site security, utilities, production, logistics, workforce safety or business continuity. Indirect impact marks issues relevant to the operating environment with no confirmed effect on a client site, route, workforce, movement, production, access, utilities or logistics. Background incidents, preparedness meetings, isolated crime, political or legal developments, corruption investigations and general policing are Monitor only unless a clear operational effect is reported.
